

Damper actuator for adjusting dampers in technical building installations

- · Air damper size up to approx. 0.4 m<sup>2</sup>
- Nominal torque 2 Nm
- · Nominal voltage AC 230 V
- · Control Open-close, 3-point

|                 | ~                                      |   |

### Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea)water, snow, ice, insolation
  or aggressive gases interfere directly with the actuator and that is ensured that the
  ambient conditions remain at any time within the thresholds according to the data
  sheet.
- · Caution: Power supply voltage!
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.

### Safety notes

- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- · Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed
  of as household refuse. All locally valid regulations and requirements must be
  observed.

#### **Product features**

Simple direct mounting The actuator is mounted directly on the damper spindle ( $\varnothing$  6...12.7 mm) with an

universal spindle clamp and then secured with the anti-rotation device supplied, to

prevent it from rotating.

Manual override Manual override with magnet possible (the gear is disengaged as long as the magnet

adheres to the magnet symbol). The magnet for gear disengagement is integrated in

the position indication.

High functional reliability The actuator is overload protected, requires no limit switches and automatically stops

when the end stop is reached.

Adjustable angle of rotation Adjustable angle of rotation with mechanical end stops.

#### **Accessories**

**Mechanical accessories** 

| Description               | Туре   |
|---------------------------|--------|
| Anti-rotation clip for CM | Z-ARCM |
| Magnet disengagement      | Z-MA   |
| Position indicator CM     | Z-PICM |

#### **Electrical installation**

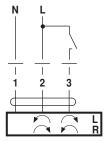

#### **Notes**

- Caution: Power supply voltage!
- Parallel connection of other actuators possible. Observe the performance data.
